

# YOKOHAMA —an Ocean Hub

## A hub of ocean-related activities

Since the opening of its port, Yokohama has developed through its connection with the ocean.

The ocean and port are close to Yokohama's citizens, and we aim to use its concentration of companies, research institutions and various other marine-related entities to make the city a hub of ocean-related activities.

# Yokohama's Goals as an Ocean Hub

- A city that is a hub of marine industry activities in Japan, a country founded upon the ocean, and draws human resources in a range of marine sectors.
- A city that brings the diverse potential of the ocean into everyday life as well as the connection between the ocean and humanity through abundant opportunities to learn about and experience the latest marine initiatives, research results and more.

## Yokohama Ocean Association

An industrial-government-academic platform made up of Japan's leading marine-sector companies and research institutions, this association is engaged in industry promotion, specialized personnel training, children's education and enhancing public awareness.

Members: 33 (as of October 2018)
