

Let's think about Yokohama's future together

Yokohama Medium-term Plan for 2022 to 2025 (First Draft)

Framework of the medium-term plan for 2022 to 2025

This plan shows the ideal form of Yokohama in 2040 and the basic strategy for achieving it. Accordingly, we have considered 9 strategies and 38 policies. We have released the first draft in order to help us create the next draft planned for December 2022, and we would like your opinions.

9 strategies and 38 policies

We have set nine medium/long-term strategies for the next 10 years, and we have condensed these into 38 policies that will be the focus of the 4-year planning period.

* For details, refer to the pamphlet for the Yokohama Medium-term Plan for 2022 to 2025 (First Draft). Refer to the next page for ways to get the pamphlet.

Strategy 1

Urban development to create a future for all children

We aim to provide greater support for children and child care by establishing an environment in Yokohama where young generations can live, and where hopeful people can be pregnant, have a baby, and raise a child in comfort.

The aim of education is "self-learning, connecting with society, and becoming a person who creates the future with others", and we want to achieve education that leads to improvements in the qualities and abilities of every child.

Related policies

- Policy 1** Strong, ongoing support for child care - Pregnancy, delivery, and infancy -
- Policy 2** Strong, ongoing support for child care - Infancy and school age -
- Policy 3** Support for troubled children and families
- Policy 4** Better protection from child and domestic abuse and better social care systems
- Policy 5** Promote education that values each child
- Policy 6** Create a rich learning environment

- Reduce the economic burden of pregnancy, delivery, and child care, including eliminating the costs of delivery (basic costs)
- Remove income limits for medical subsidies and the need for partial payments for children up through junior high grade 3, and establish an environment so that children can be examined by medical institutions with peace of mind
- Ensure that all children are eating school lunches, establish a delivery-based supply system, and supply school lunches that are satisfactory to students
- Establish a new look for libraries and provide a rich learning environment for citizens

Pamphlet pages 23 to 36

Strategy 2

Urban development for allowing people to be active throughout their life

We will help people be healthy and realize the value in life, and we will achieve a harmonious community where you can live as you like in an area where you are comfortable and want to be.

We will improve care, treatment, health, and welfare so that you can live comfortably, true to yourself regardless of if you require medical treatment or care.

Related policies

- Policy 7** Ensure the health and comfort of citizens
- Policy 8** Improve sports environments
- Policy 9** Stimulate regional communities
- Policy 10** Promote mutual support in communities
- Policy 11** Promote multicultural harmony
- Policy 12** Support gender equality
- Policy 13** Support disabled children/adults
- Policy 14** Support daily life and independence
- Policy 15** Promoting comprehensive regional care that supports the daily life and comfort of the elderly
- Policy 16** Promote home medical treatment and care
- Policy 17** Improve the system for providing medical treatment

Enhance operational support for local governments

Support the independence of individuals with trouble in daily life

Improve the medical system so that it is streamlined from pregnancy/childbirth through child care

Pamphlet pages 37 to 60

Strategy 3

Achieving "Zero Carbon Yokohama"

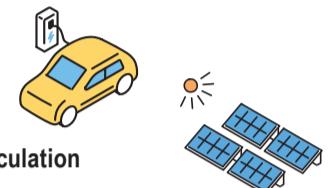

In order to achieve carbon neutrality by 2050, 50% has been set as the target for greenhouse gas reductions by 2030, and the advancement of initiatives involving cooperation with citizens and businesses will lead to further growth in the city through decarbonization.

We aim to create a Sound Material-Cycle Society while contributing to the success of the SDGs for 2030.

Related policies

- Policy 18** Promoting a de-carbonized society
- Policy 19** Promoting sustainable resource circulation

Strategy 4

Achieve economic growth to pioneer the future and achieve "International City, Yokohama"

We will support the succession or development of small and medium-sized businesses, the promotion of open innovation with various parties, and the creation of an environment that appeals to overseas workers and businesses to achieve more economic growth in Yokohama and generate appeal as the "International City, Yokohama".

Related policies

- Policy 20** Strengthen the business foundations of small and medium-sized businesses
- Policy 21** Promote the creation of startups and innovation
- Policy 22** Promote tourism and MICE
- Policy 23** Establish a community in the city for cooperation with universities
- Policy 24** Support international businesses and solve global issues
- Policy 25** Become an international city in order to bring people together from around the world

Stimulate shopping districts
Further regional contributions through the intellectual assets and research results of universities in the city

Strategy 5

Urban development of suburbs that continue to create new value

We aim to develop suburbs that can sustain diverse lifestyles by maintaining a positive living environment, by responding to changes in work and lifestyles, and by maintaining and improving regional transportation.

Related policies

- Policy 26** Developing attractive and charming suburbs
- Policy 27** Developing residences and an environment that are rich and easy to live in
- Policy 28** Achieve regional transportation that supports daily life

Attract and promote strategic land use
Create new sites to stimulate the Kamiseya area
Initiatives for holding the World Horticultural Exhibition

With the intent to support the mobility of the elderly, we are considering comprehensive mobility services for the region that are sustainable, such as an elderly pass system (free for people ages 75 and up) based on the usage results obtained following the conversion of elderly passes to IC cards, etc.

Pamphlet pages 81 to 88

Strategy 6

Development of urban and oceanside areas that create growth and activity

Pamphlet pages 89 to 94

We will improve environments so that people and businesses from Japan and abroad can gather and be active and to develop an attractive city where people want to visit.

We will achieve a city that is growing and active by systematically renewing and upgrading the functions of existing facilities and generating interest and activity through "Culture, Art and Creative City Measures".

Related policies

Policy 29

Development of active urban and oceanside areas

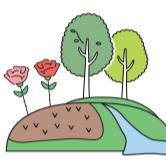

Policy 30

Promote a "Culture, Art and Creative City" that is relevant to citizens

- Promote re-development of the Yamashita Pier
- Promote activity through improved navigability and cooperation with various parties

Strategy 7

Achieve Garden City Yokohama, with the appeal of flowers, greenery, farms, and water

Pamphlet pages 95 to 100

The promotion of "Garden City Yokohama", which uses the flowers, greenery, farms, and water that provide various blessings; the encouragement of understanding and actions regarding the conservation of biological diversity; and the development of active urban agriculture will contribute to the success of the World Horticultural Exhibition planned to be held in 2027, generate attractions and excitement unique to Yokohama, and achieve abundant living through life alongside nature.

Related policies

Policy 31

Establish an urban environment rich in nature

Policy 32

Developing lively urban agriculture

Improve the zoos in order to strengthen urban branding

Strategy 8

Development of a city that is highly safe and comfortable in relation to disasters

Pamphlet pages 101 to 108

We will take hard and soft measures to protect the lives of citizens, maintain the functions of the city, and so that recovery can be swiftly performed even if natural disasters, such as large-scale earthquakes, or damage due to wind and water occur. This will achieve a resilient city where anyone can live in safety and comfort.

Related policies

Policy 33

Urban development resistant to earthquakes

Policy 34

Urban development resistant to wind and water damage

Policy 35

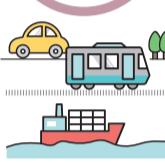

Urban development for disaster preparedness to support communities

Increase awareness of disaster preparedness (improve awareness for helping oneself)

Strategy 9

Urban development that supports civic life and economic activities

Pamphlet pages 109 to 116

We are promoting the development of transportation networks and an internationally-competitive port to further develop the economy of Yokohama and to bring in people and investments from Japan and abroad. We are systematically and effectively promoting maintenance and upgrades to public facilities in order to improve the functions of the city.

Related policies

Policy 36

Improve the transportation network

Promote the development of rail networks

Policy 37

Comprehensive port development for international competitiveness

Policy 38

Systematically and effectively maintain and upgrade public facilities

Administrative management

Responsible and trustable administrative management based on the Basic Policy for Administrative Management

Pamphlet pages 121 to 134

Yokohama faces the diverse and complex issues of a large city. In order to make the municipal policies sustainable, Yokohama City Hall and each member of staff focus on "the citizen's point of view", "speediness", and "comprehensive optimization", and we will promote administrative management to support the realization of our policies with a fiscal foundation.

Initiatives for the next 4 years

1	Optimize the organization and maximize the abilities of staff and the execution of roles ① Establish an organizational structure and promote a salary system that are suitable for the current generation ② Train human resources for stronger teamwork and establish a work environment that is easy to work in
2	Optimize administrative services ~ create or transform operating procedures ~ ① Promote DX to create new value and services ② Promote sustainable administrative management to meet the needs of citizens
3	Improve civic governance and further stimulate activity in communities through collaboration and co-creation

Source Basic Policy for Administrative Management

We are creating the Basic Policy for Administrative Management as a general policy for "organizations and personnel" and "administrative frameworks" in order to "create and transform" Yokohama City Hall. The "Yokohama Medium-term Plan (Administrative Management)" indicates the main targets, indicators, and activities of the next 4 years in detail based on the direction of the "basic policy".

Planning schedule

Publication of first draft
(August 2022)

Publication and planning of rough draft
(Planned for December)

The "Basic Policy for Administrative Management" (first draft) can be viewed on the website and at the Citizen Information Center or any ward office.

Fiscal management

Advance policies while maintaining fiscal health in accordance with the fiscal vision

Pamphlet pages 135 to 146

We will set fiscal targets, create fiscal initiatives, and promote sustainable fiscal management at the foundation of civic policy for appropriately responding to diverse, complex problems in order to advance policies while maintaining fiscal health in accordance with the "Fiscal Vision for Sustainable Development in Yokohama" (established June 2022).

Initiatives for the next 4 years

1	Debt management from a medium/long-term perspective based on thorough debt management governance
2	Improve the stability and structure of funding based on strategic and comprehensive initiatives
3	Promote comprehensive asset management (facility management)
4	Efficient and effective budget restructuring and execution based on stronger expenditure governance
5	Share information and raise issues to gain the support of citizens

Source "Fiscal Vision for Sustainable Development in Yokohama" (fiscal vision)

The fiscal vision was established through discussions in municipal meetings as a medium/long-term fiscal policy for specifying and enacting the "Ordinance on Promoting Responsible Fiscal Management for Yokohama's Future".

The "fiscal vision" is posted on the website, and it can be viewed at the Citizen Information Center or any ward office.
