

The City of Yokohama conclude MoU for Acceptance of Ammonia-Fueled Tugboat

The City of Yokohama is pursuing decarbonization at its port as the city works to realize a Carbon Neutral Port.

NYK Line, IHI Power Systems Co., Ltd., and Nippon Kaiji Kyokai (ClassNK) (i.e., “the Parties”) develop the Ammonia-Fueled Tugboat which reduce environmental load and aim to operate as demonstration around 2024.

The City of Yokohama has signed a memorandum of understanding (MoU) with the Parties for the acceptance of an ammonia-fueled tugboat (A-Tug) at the port of Yokohama.
